

Bus Expansion System

EXPANSION UNIT BUS ADAPTER

An expansion system is used to expand the number of available PCI bus slots of either CONTEC industrial computers or standard PCs. It is also useful in applications where the power consumption of add-on boards exceeds the power supply capacity of the host PC. An expansion system is used to join the expansion chassis and the host PC into one system.

Product Lineup

We provide wide array of models to meet your desired bus specifications.

Bus Extension Type Expansion Adapter & Chassis

M-03

Standard Bus extension

This bus extension externally expands PCI bus and transmits signals directly between the expansion chassis and host PC. It is best suited for use in an environment where the measurement control is conducted in close proximity to the host PC.

* The expansion adapters to be inserted in the PC and expansion chassis are connected with a 1m-long connection cable.

StarFabric-compliant Type Expansion Adapter & Chassis

M-07

StarFabric-compliant extension

With this style extension, you can conduct StarFabric-compliant high-speed serial transfer (2.5Gbps). The expansion adapters to be inserted into the PC and expansion chassis are connected using Category 5e cable creating easy wiring and installation. The included cable can be extended up to 12m, making it an optimal choice where measure / control is conducted at a distance from the host PC. PCI bus compliant, it allows you to construct a system without changing existing boards or software. The power supply of the expansion chassis can be controlled in synchronization with the host PC power supply.

Caution:

Please note that the following expansion boards cannot be used inside an expansion chassis.

- Video boards
- Additional PCI bus expansion boards
- Boards with the disclaimer "Cannot be used with PCI-to-PCI Bridge"
- Please note that even when a board is compatible with PCI bus specifications, it may not operate due to specification limitations.

* For further details, please check the manual or visit our web site.

An expansion adapter is an adapter that connects a host PC to an expansion chassis for the purpose of extending high-speed signal transmission. It is not possible to link one expansion chassis to another expansion chassis due to resultant signal degradation. When using more than one expansion chassis, you must allocate an open slot to each chassis for a parallel connection.

Bus Extender LPCI bus slot Expansion Adapter (Host PC) EAD(LPCI)BE

- PCI bus (5V/32bit 33MHz) can be added using one Low Profile or Standard PCI slot of the host PC.
- Expansion chassis can be selected to match required number of PCI slots and add-on board size.
- The expansion chassis power supply can be turned on & off with the host PC power supply.
- Both Low Profile and Standard PCI slots are supported by using the included bracket.

Bus Extender PCI bus slot Expansion Adapter (Host PC) EAD(PCI)BE

- PCI bus (5V/32bit 33MHz) can be added using one PCI slot of the PC.
- Expansion chassis can be selected to match required number of PCI slots and add-on board size.
- The expansion chassis power supply can be turned on & off with the host PC power supply.

Bus Extender CardBus slot expansion adapter (Host PC) EAD(CB)BE

- PCI bus (5V/32bit 33MHz) can be added using one CardBus slot of a Note-PC.
- Expansion chassis can be selected to match required number of PCI slots and add-on board size.
- The expansion chassis power supply can be turned on & off with the host PC power supply.
- Supported OS: Windows XP, Windows 2000, Windows Me, Windows98SE and Windows 98.

Bus Expansion System

StarFabric-compliant
PCI bus Expansion Chassis
(×4 Short size slots, On board Power)
ECH(PCI)SF-H4A

4 Slots **Short Size** **Power On board**

- 4× PCI expansion slots
- Length accommodates short-size PCI add-on boards (5V/32bit)
- The chassis power supply can be turned on & off with the power

StarFabric-compliant
PCI bus Expansion Chassis
(×7 Long size slots, On-board Power)
ECH(PCI)SF-F7A

7 Slots **Short Size** **Long Size** **Power On board**

- 7× PCI expansion slots
- Length accommodates long-size PCI add-on boards (5V/32bit)
- Chassis power supply can be turned on & off with the host PC power supply

StarFabric-compliant
PCI bus Expansion Chassis
(×13 Long size slots, On-board Power)
ECH(PCI)SF-F13A

13 Slots **Short Size** **Long Size** **Power On board**

- 13× PCI expansion slots
- Length accommodates long-size PCI add-on boards (5V/32bit)
- Chassis power supply can be turned on & off with the host PC power supply

Model	ECH(PCI)SF-H4A	ECH(PCI)SF-F7A *2	ECH(PCI)SF-F13A *2
Bus type	PCI Local Bus Specification Rev2.2 (+5VDC)		
Address Space	Memory: 32-bit addressing, I/O: 32-bit addressing		
Interrupt Level	INTA-INTD		
Bus Clock	33MHz (Max.)		
User slots	4 (short-size)	7 (Long-size)	13 (Long-size)
Installable Board (mm)	176.5(L) × 107(H)	313.8(L) × 107(H)	
Power supply capacity (Max.)	+5VDC: 11.3A, +3.3VDC: 6A, +12VDC: 3A, -12VDC: 0.7A		+5VDC: 18A*1, +3.3VDC: 15A*1, +12VDC: 9A, -12VDC: 1A
AC input voltage	115/230VAC (switch selectable)		
Overall maximum power supply capacity	130W	0~30°C: 230W, 30~40°C: 205W, 40~50°C: 175W	
Operating Conditions	0~50°C, 20~80%RH (no condensation)		
Dimensions (mm)	210.0(W) × 235.0(D) × 138.0(H)	300.0(W) × 372.2(D) × 138.0(H)	424.0(W) × 372.2(D) × 156.0(H)
Weight	3.5kg	5.0kg	9.5kg

Note: *1: The sum of +5VDC/+3.3VDC can not exceed 90W. *2: This product cannot be used with the ECH(CB)BE expansion chassis.

PCI to PCI Bus Expansion System (4 Slots) **BUF(PCI)4**

- External backplane expansion slots function as regular PCI slots
- Using ATX power supply, Chassis power supply can be turned on & off with the host PC power supply.
- * It cannot be used in PC-9800 series.

PCI to PCI Bus Expansion System (7 Slots) **BUF(PCI)**

- External backplane expansion slots function as regular PCI slots
- Using ATX power supply, Chassis power supply can be turned on & off with the host PC power supply.
- * It cannot be used in PC-9800 series.

PCI to PCI Bus Expansion System (13 Slots) **BUF(PCI)13**

- External backplane expansion slots function as regular PCI slots
- Using ATX power supply, Chassis power supply can be turned on & off with the host PC power supply.
- * It cannot be used in PC-9800 series.

PCI to ISA Bus Conversion System **BUF-PCI(PC)**

- Standard ISA slots can be connected from a PCI slot of host PC.
- Included driver software for Windows XP/2000/NT/Me/98/95.
- I/O access wait and refresh signal for the expansion unit.

Attached cable	96-pin shielded cable, 1m *1			
Note:	*1: Only the Attached cable can be used. *2:This product provides I/O access to ISA bus board. It is subject to software and hardware restrictions. Please contact General Information for details.			

Bus Expansion System

PCMCIA to ISA Bus Conversion System BUF-CARD(PC)P

- Standard ISA slots can be connected from a PC Card (PCMCIA) slot of host PC.
- Supported OS: Windows XP/2000/98/95/3.1, MS-DOS

ISA to ISA Bus Expansion System BUF(PC)E

- Standard ISA slots can be connected from a ISA slot of host PC.

ISA to PCMCIA Expansion Board PC-CARD(PC)H

- Compatible with PC card Type I, Type II, and Type III based on PCMCIA 2.1 / J EIDA 4.2 or later
- Maximum 2pcs. can be mounted simultaneously on the same system.
